Skill Set

Languages	**JavaScript** (Expert), **Java** (Proficient), **Python** (Proficient), **C++** (Functional)
Web Dev	**HTML5**, **CSS**, **SQL and NoSQL**, **React**, **Nodejs**
Tools	**Git** (Expert), **Shell** (Proficient), **Vim** (Expert)

Work Experience

Co-founder & CTO
Jan 2020 - Present

allround.club, Bangalore

Freelance Software Developer
Aug 2019 - Dec 2019

Bangalore

Policy in Action Fellow (Bangalore 2019)
Jan 2019 - Feb 2019

Young Leaders for Active Citizenship, YLAC

- Prepared a policy brief for an MP by having conversations with stakeholders and analyzing publicly available data on the topic.
- Understand the public policy landscape in Indian and learn about effective advocacy and sound policy making.

Associate, Systematic Market Making
Jan 2019 - Jul 2019

Goldman Sachs, Bangalore

- Worked on Principal Liquidity Provision and systematic internalizer (SI) for the MiFiD II regime.
- Scaled the web infrastructure (Vertx, Angular, React) as a full stack developer, to visualize and monitor realtime data streams over web sockets.
- Optimized million rowed data streams by sending deltas and chunking of messages over ZeroMQ for performant message delivery.
- Develop the SRE and monitoring infrastructure of the team using a variant of the TICKstack (Telegram, Influx, Grafana, Kapacitor)

Analyst, Systematic Market Making
Dec 2017 - Dec 2018

Goldman Sachs, Bangalore

Analyst, Central Risk Book
June 2015 - Nov 2017

Goldman Sachs, Bangalore

- Designed a low latency block pricing REST service in Java and Vertx; dynamically adjusting quotes for volatility and volument in market.
- Generated a data certification and analytics framework which served as the gold standard for data driven policy decisions.
- Created a framework for realtime functional monitoring of processes using web based D3.js visualization and live timeseries based metrics generated processes.
- Built a resilient reference data framework which computes static data at the beginning of the day for over thousands of entities in few minutes. The framework is currently being used worldwide within Goldman.
- Overhauled the UI/UX with a React/Redux based soultion on the frontend and a Vertx3 based REST backend to bring our interfaces closer to the industry.

DevOps Engineering
May - June 2015

Klozee, Bangalore

- Automated developer operations by creating a heroku style push to deploy model on AWS.
- Worked full stack on Express, Angular, Node and Angular to create an apparel store for the web app.

Multi Factor Authentication in OpenVPN
2014 - 2015

Mozilla Winter of Security, Guillaume Destuynder, Professor Dheeraj Sanghi [Wiki]

- One of the **eleven** teams all over the **world** to be selected as a part of Mozilla's Winter of Security Initiative 2014.
- The objective of the project was to implement true **arbitrary multi-factor authentication** support in **OpenVPN**; and to implement **session-support** for the additional factors.
- The wiki for the project is located at https://wiki.mozilla.org/Security/Mentorships/MWoS/2014/OpenVPN_MFA

Research Intern
May-July 2014

Microsoft Research India, Bangalore

- Analysed the implementations of different distributed systems and databases architectures like **Google MapReduce**, **Google FileSystem**, **Google MillWheel**, **Amazon DynamoDB**, **Apache Hadoop**, to understand the design decisions involved.
- Used **TPL Dataflow** and **Lightweight Tasks** to implement concurrent pipeline processing of messages in CScale to preserve processing order of partially ordered messages.
- Performed **performance testing**, **failure testing** of the existing infrastructure.

Software Development Intern — May-July 2013
Aurus Networks', Bangalore

Awards and Achievements
